10 Best VoIP Packages in South Africa for Businesses

<p> Looking for the right VoIP package for your business?

This guide compares the best VoIP packages available from leading South African providers. Whether you need a voice-only solution, bundled fibre or LTE VoIP packages, or uncapped calling plans, you'll find detailed options, features, and pricing throughout this article.

[Contact United Telecoms](#) to enquire about our wide range of feature-rich VoIP solutions designed for small, medium, and large businesses across South Africa.

H2: Key Takeaways

- VoIP packages in South Africa range from R50 to R5,750+ monthly with pay-as-you-go, bundled minutes, or unlimited calling options.

- Business packages, such as those offered by United Telecoms, include advanced features like call recording and CRM integration, which are not available in basic home packages.
- Contract flexibility varies from month-to-month to 24-month options.
- Enterprise providers such as United Telecoms, Vox and Vodacom offer Teams integration and multi-branch connectivity for large organisations.

H2: Types of Business VoIP Packages in South Africa

<p> South African businesses can choose from several types of VoIP packages, each structured to address different usage patterns, budget requirements, and infrastructure needs.

H3: Voice/VoIP Only Packages

Voice-only VoIP packages deliver telephone services over existing internet connections without bundling connectivity.

These packages range from R45 to R400+ per user monthly, with pay-as-you-go and fixed bundle options available. Entry-level packages provide basic calling functionality, while premium tiers include call recording, auto-attendant, and CRM integration.

Voice-only packages are suitable for businesses with existing, reliable internet infrastructure or organisations that want the flexibility to switch connectivity providers without disrupting their voice services.

H3: VoIP and Broadband (Fibre/LTE) Combo Packages

Combo packages bundle internet connectivity with voice services from a single provider, saving businesses 15-30% compared to purchasing them separately.

Pricing starts from R300 per month, with guaranteed bandwidth and prioritised quality of service for voice traffic. Businesses need at least 100 kbps per concurrent call, with fibre offering the most stable performance.

These packages are ideal for new offices, companies upgrading from copper lines, or organisations seeking simplified vendor management with unified billing and support.

H3: VoIP Packages with Bundled Minutes

VoIP packages with bundled minutes offer predetermined call allowances with competitive rates for local and national calls.

Call packages typically start from R50 monthly, with 50-1,250 included minutes, charging per second or per minute for additional usage. Choose bundled minute packages if your team makes under 500 minutes of calls monthly with predictable usage patterns.

These packages are suitable for small businesses or companies that seek budget control while allowing occasional usage spikes beyond the included allowances.

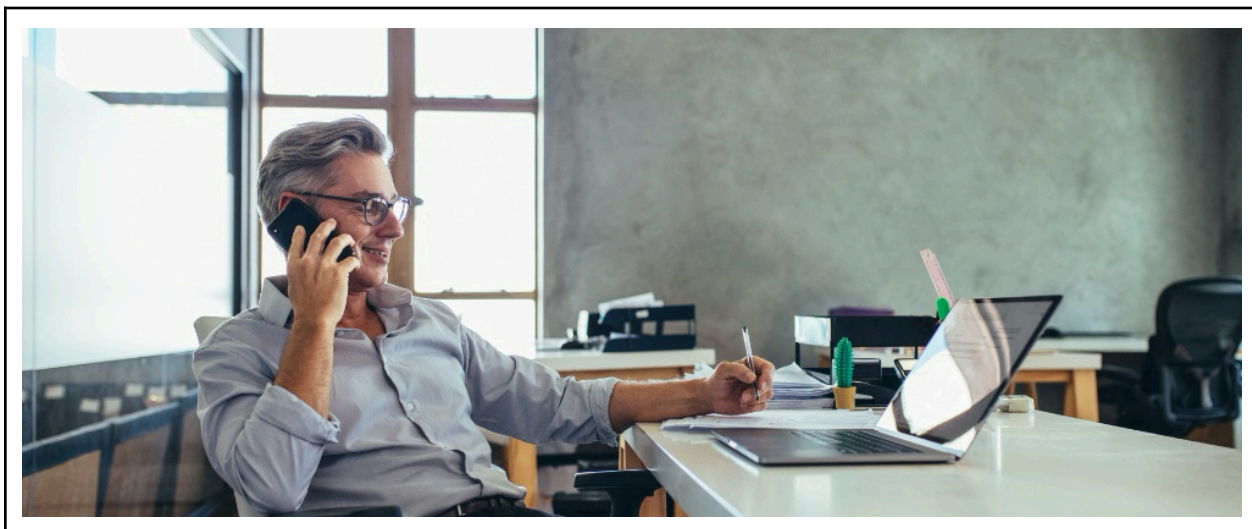

H3: Uncapped/Unlimited VoIP Calling Packages

Unlimited packages provide unrestricted calling to specified destinations (typically SA local, national, and mobile) at fixed monthly rates based on concurrent call capacity rather than minutes used.

Pricing ranges from R145 to R5,750 per month. Most providers apply fair usage policies (typically 3,000-5,000 minutes).

Choose unlimited packages if your team consistently exceeds 500 minutes monthly, as they eliminate bill shock and simplify budgeting for high-volume sales or support teams.

Selecting the right [VoIP service provider](#) and package depends on your call volume, budget, and the specific features you require. [Contact United Telecoms](#) today to discuss which Voice over Internet Protocol package best suits your business communication needs.

H2: Explore the Best VoIP Packages for Your Business

<p> **Let's** compare VoIP packages from leading South African providers, each offering different pricing structures, features, and scalability options.

Whether you're a startup or an established enterprise, these packages cater to businesses of different sizes and communication needs.

Find the package that delivers optimal value and matches your call volume and budget.

H3: 1. United Telecoms Business VoIP Packages - Best Overall

<p> With over 35 years in South Africa's telecommunications landscape, United Telecoms delivers [VoIP solutions](#) that adapt to suit the needs of small, medium, and large businesses.

United Telecoms offers VoIP-only packages (for customers with existing broadband connections) or bundled solutions that include LTE or Fibre connectivity. with bundled minutes or unlimited calling options.

These solutions offer reliable multi-location communication, seamless scalability, and expert technical support.

H4: VoLTE Packages (LTE-based):

- United Voice Lite: R430/month (1-8 users)
- United Voice Essential: R640/month (9-15 users)
- United Voice Pro: R1,190/month (16-30 users)

Learn more about our [VoLTE packages](#).

H4: Fibre VoIP Packages:

Lite packages (month-to-month, best effort service):

- 25Mbps: From R899/month
- 50Mbps: From R1,149/month
- 100Mbps: From R1,349/month
- Includes a WiFi router, free installation, and the United Voice Service

Premium managed packages (24-month contract, dedicated support):

- 20Mbps: From R1,649/month
- 50Mbps: From R2,349/month
- 100Mbps: From R3,649/month
- Optional VLAN addition: From R649/month (separates voice/data traffic with QoS)

All packages include number porting, unlimited remote support, [Microsoft Teams integration](#), VoIP monitoring services, [call recording](#), [cloud analytics](#) and Telephone Management System access.

[Contact United Telecoms](#) today to discuss which package suits your business communication requirements.

H3: 2. Telkom VoIP Packages - Best for Telkom Ecosystem Integration

<p> With 33 years of market presence, Telkom leverages its extensive infrastructure to offer VoIP packages that integrate naturally with existing Telkom internet services.

Telkom provides unlimited calling packages, BizTalk plans with bundled minutes, SIP trunking for PABX systems, and combined LTE + VoIP bundles.

These packages deliver consolidated billing, competitive out-of-bundle rates, and seamless integration for businesses already using Telkom connectivity.

The Telkom logo is displayed in a bold, blue, sans-serif font.

H4: Unlimited VoIP Lines:

- Unlimited VoIP 1-20: From R145/month
- Unlimited on/off-net calls (Fair Usage Policy applies)
- Free for Telkom Internet bundle customers; R50.44/month for other ISP customers
- Free installation included

H4: BizTalk Fibre Plans:

- BizTalk Fibre 400 to Unlimited: From R209/month
- 200 Fixed-to-Fixed minutes (on-net) + 200 Fixed-to-Mobile minutes
- Out-of-bundle rate: 79c per minute
- Available on any broadband connection

H4: BizTalk VoIP PABX Plans:

- BizTalk VoIP 800-2700: From R405/month
- 400 Fixed-to-Fixed + 400 Fixed-to-Mobile minutes
- 2 SIP sessions with 55c out-of-bundle rate
- Designed for SIP trunking on PABX systems

H4: Bundled LTE + VoIP:

- 10Mbps LTE with Unlimited VoIP: R658/month (24-month contract)
- Includes router and installation

Telkom's strength lies in its bundled approach, making it particularly suitable for businesses already invested in Telkom's ecosystem.

The free VoIP service for existing internet customers, combined with competitive out-of-bundle rates, makes these packages cost-effective for companies seeking integrated solutions.

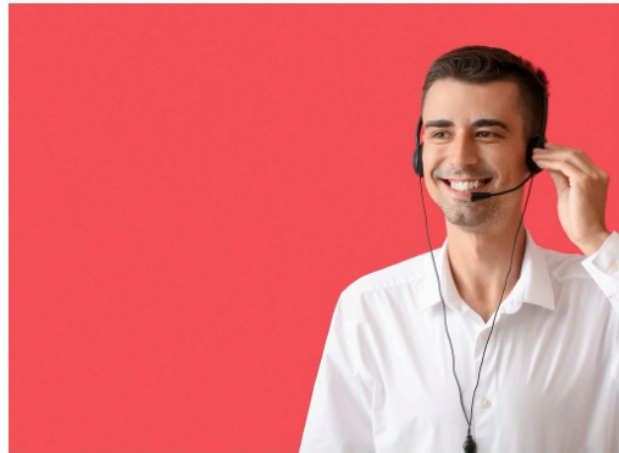

Visit [Telkom's website](#) to explore packages tailored to your business communication needs.

H3: 3. Vodacom Business VoIP Packages - Best for Multi-Branch Connectivity

<p> With over 30 years of network expertise, Vodacom delivers VoIP infrastructure designed for businesses with multiple locations across South Africa.

Vodacom offers calling plans with bundled minutes or unlimited options, plus specialised services including interbranch calling via MPLS IP network, local and national routing, and VoIP-to-cellular connectivity.

These packages eliminate toll charges between offices, integrate with existing PBX systems, and provide enterprise-grade reliability through Vodacom's managed network infrastructure.

H4: Vodacom VoIP Calling Plans:

- 250 Anytime minutes: R134.99/month
- 500 Anytime minutes: R234.99/month
- Unlimited Anytime minutes: R399.99/month (Fair Usage Policy: 3,000 minutes)
- Out-of-bundle rates apply; international calls are charged separately

Core VoIP Service Features:

VoIP Interbranch:

- Free on-net calls between company branches via MPLS IP network
- SD-WAN integration for seamless routing

VoIP Local & National:

- Significant savings on South African calls
- Traffic routed over MPLS to PSTN

VoIP Cellular:

- Mobile calls are routed over Vodacom's data network
- Eliminates congestion and latency issues

Vodacom's approach reduces the need for extensive capital expenditure by working with most existing PBX systems and managing all infrastructure.

Geographic number porting is available, or new numbers can be allocated.

Visit [Vodacom's website](#) to explore VoIP packages designed for multi-branch business connectivity.

H3: 4. Afrihost VoIP Packages - Best for Budget-Conscious Businesses

<p> With 24 years of telecommunications experience, Afrihost delivers Pure VoIP services designed for startups and small businesses seeking affordable, contract-free telephony.

Afrihost offers pay-as-you-go CallTime packages with no monthly rental fees, true per-second billing, 3-month rollover, and free calls to all Pure VoIP and CTTEL network numbers globally.

These packages offer cost control, geographic number porting, and flexible device compatibility, all without requiring fixed-term contracts or hidden fees.

H4: Afrihost Pure VoIP Packages:

- VoIP 50: R50/month
- VoIP 100: R100/month
- VoIP 300: R300/month
- VoIP 500: R500/month

Key features:

- CallTime credit: Purchase calling credit that you use for outbound calls (no monthly line rental or subscription fees)
- Free calls to all Pure VoIP and CTTEL network numbers (including Axxess VoIP) globally
- True per-second billing with no hidden costs
- CallTime rolls over for 3 months; top-ups last 30 days from purchase
- Call rates from 10c/minute (excluding free calls)
- Geographic number porting available
- Works with VoIP-enabled phones or desktop/mobile softphone applications
- Yealink IP desk phones are available for purchase

Afrihost's strength lies in its simplicity and transparency, with no complex bundles or surprise charges.

The contract-free structure and global free calling between Pure VoIP users make it ideal for budget-conscious businesses with predictable, moderate call volumes.

Explore [Afrihost's Pure VoIP packages](#) for flexible, affordable business telephony.

H3: 5. Voys Telecom VoIP Packages - Best for Remote and Hybrid Teams

<p> With 18 years of cloud telephony experience, Voys delivers a self-service VoIP infrastructure designed for remote and hybrid workforces requiring seamless multi-device connectivity.

Voys offers cloud telephone systems with free national calls, a 99.9% uptime guarantee, and 15-minute setup on month-to-month contracts.

These packages offer cross-device functionality, real-time presence status, Cape Town-based support, and substantial savings on local and international calls, all without incurring capital expenditure.

H4: Voys VoIP Cloud Telephone System:

- From R400/user/month on flexible month-to-month contracts
- Free national calls to mobile and landline numbers
- 99.9% uptime guarantee with transparent incident reporting

Key features:

- Works across any device (desk phones, mobile app, web browser)
- Self-service web portal for 24/7 user management and configuration
- Real-time presence status and colleague availability visibility
- OPUS audio codec for superior call quality
- Cape Town-based support team (no offshore call centres)
- Setup completed within 15 minutes
- Integration with desk phones and cordless VoIP handsets
- No capital expenditure required

Savings potential:

- Up to 60% savings on local calls
- Up to 90% savings on international calls

Voys suits businesses prioritising remote work flexibility and self-service management capabilities.

The platform's emphasis on ease of use and transparent uptime reporting appeals to companies seeking minimal IT involvement in day-to-day telephony management.

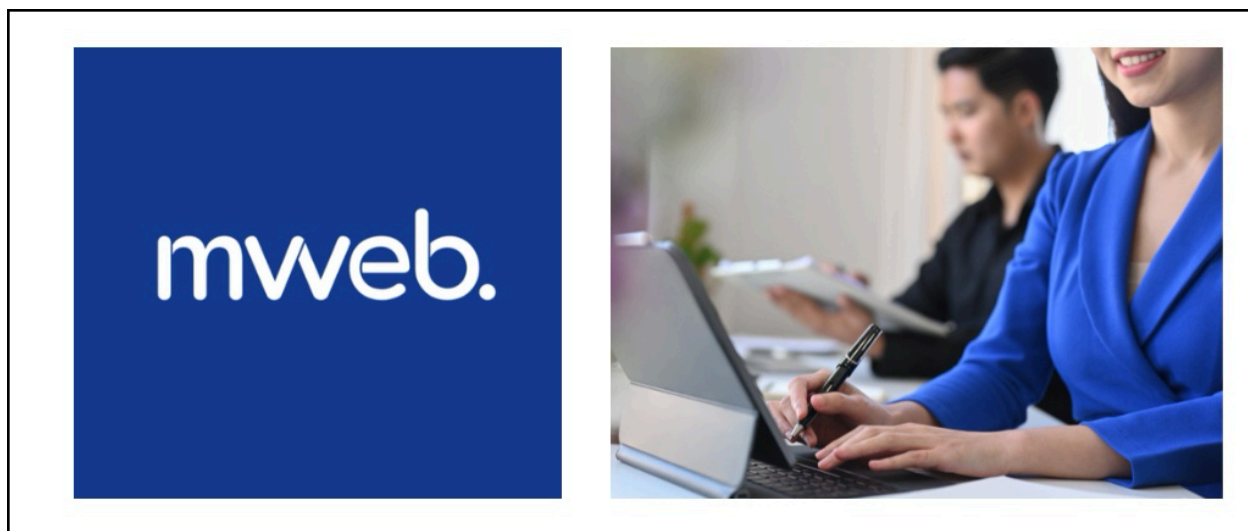

Explore [Voys Telecom's VoIP packages](#) for hybrid workforce communication solutions.

H3: 6. Mweb VoIP Packages - Best for Predictable Minute-Based Pricing

<p> With over 1.4 million homes connected across South Africa, Mweb has established itself as a popular and affordable choice for internet and voice communication services.

Mweb offers tiered voice calling packages with HD voice quality, easy self-installation, and free calls to other Mweb numbers. International calling is also available at competitive rates.

These packages offer transparent, minute-based pricing, number porting, caller ID, and call forwarding, and are compatible with VoIP handsets or mobile/desktop apps, eliminating the need for technician assistance.

H4: Mweb Voice Calling Packages:

- 150 minutes: R69/month
- 300 minutes: R119/month
- 600 minutes: R219/month
- 1,250 minutes: R399/month

Key features:

- Free calls to other Mweb Voice Calling numbers
- HD voice quality using internet connectivity
- Easy self-installation with no technician required
- Number porting is available across all packages
- Caller ID, itemised billing, and call forwarding included
- Works with VoIP handsets or mobile/desktop apps (Zoiper recommended)
- International calling available (UK: R0.10/min, US: R0.14/min, Australia: R0.32/min)
- Local minute top-ups via online account
- Easily scalable as your business grows

Mweb's strength lies in its transparent minute-based pricing structure and proven track record serving diverse customer segments.

The service works particularly well for businesses already using Mweb internet connectivity.

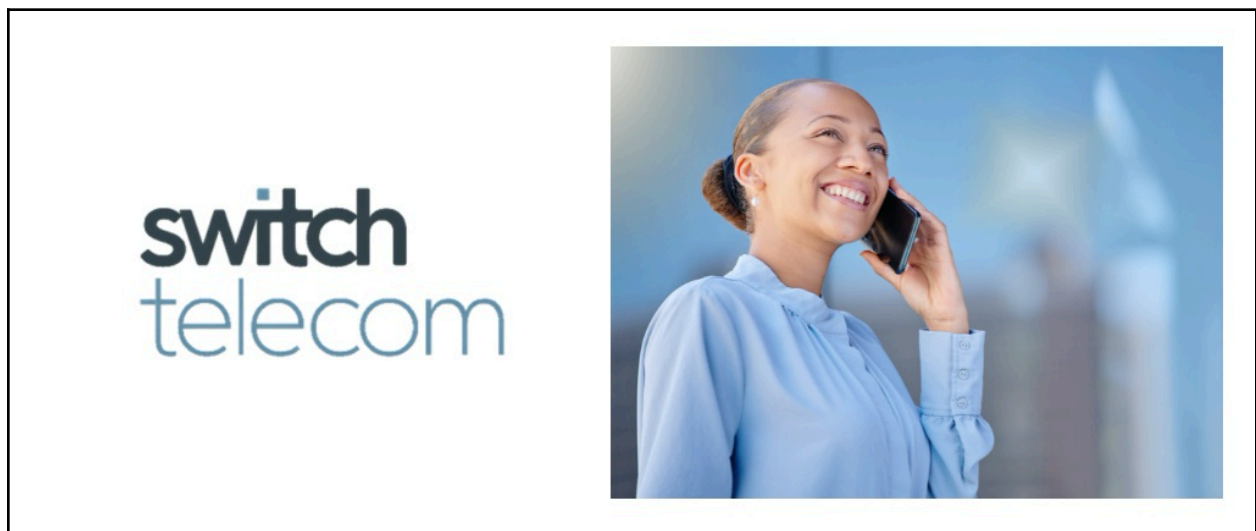

Explore [Mweb's Voice Calling packages](#) for straightforward business telephony.

H3: 7. Switch Telecom VoIP Packages - Best for Fixed-Price Unlimited Calling

<p> With over 16 years of VoIP experience, Switch Telecom delivers straightforward unlimited calling solutions that scale from single home office lines to multi-channel SIP trunking for growing businesses.

Switch Telecom offers unlimited VoIP packages for SA local, national, and mobile calls (some including international destinations), scalable SIP trunk options based on concurrent call capacity, and usage-based alternatives with per-minute billing.

These packages offer transparent pricing without peak/off-peak variations, a free mobile softphone, number porting, no setup costs, and complimentary remote support.

H4: Unlimited VoIP Line Packages:

- Unlimited VoIP Line Lite: R161/month (1 outbound, 2 inbound calls)
 - Suitable for home offices
 - SA local, national, and mobile calls
- Unlimited VoIP Line Premium: R345/month (2 outbound, 4 inbound calls)
 - Home and small business use
 - Includes popular international destinations

H4: Unlimited VoIP SIP Trunk Packages

- Unlimited VoIP SIP Trunk 4: R1,150/month (4 outbound, 8 inbound calls)
- Unlimited VoIP SIP Trunk 8: R2,875/month (8 outbound, 16 inbound calls)
- Unlimited VoIP SIP Trunk 16: R5,750/month (16 outbound, 32 inbound calls)

Usage-Based Package

Monthly Service Fee:

R100.00 (including VAT) for 4 channels
R25.00 (including VAT) per extra channel

Optional Monthly Service Fee (Usage-based and Unlimited):

R10.00 (including VAT) per additional individual number
R50.00 (including VAT) per block of 10 sequential numbers
R250.00 including VAT) per block of 100 sequential numbers

H4: Usage-Based Call Rate Packages:

- Package 1: From R0.28/min (60-second minimum, 30-second increments) for longer calls
- Package 2: From R0.30/min (per-second billing) for shorter calls

Key features:

- Free Switch Telecom Mobile Softphone with Unlimited packages
- Geographic and non-geographic number options
- Number porting available
- No setup costs
- Free remote support
- Easy call diversion during connectivity failures

Switch Telecom's strength lies in flexible scaling options and straightforward pricing without hidden charges. Visit [Switch Telecom's website](#) to explore VoIP solutions designed for growing businesses.

H3: 8. Axxess VoIP Packages - Best for Simple, Contract-Free VoIP Services

<p> With over 27 years of serving South African internet users, Axxess delivers VoIP services designed for home users and small businesses seeking straightforward, no-contract telephony.

Axxess offers pay-as-you-go CallTime packages with no monthly rental fees, true per-second billing, 3-month rollover, and free calls to all Axxess VoIP numbers globally.

These packages provide instant QR code setup, support for up to 6 concurrent calls per account, a free smartphone app, and flexible device compatibility without subscription fees or hidden costs.

H4: Axxess VoIP CallTime Packages:

- CallTime 50: R50/month
- CallTime 100: R100/month
- CallTime 300: R300/month
- CallTime 500: R500/month

Key features:

- No monthly line rental or subscription fees
- Free calls to all Axxess VoIP numbers globally
- True per-second billing with no hidden costs
- CallTime rolls over for 3 months
- Free unique 087 number provided, or port existing geographic number
- Works with VoIP phones or free Axxess Voice smartphone app (Android/iOS)
- Up to 6 devices can be configured per SIP account for 6 concurrent calls
- QR code setup for instant smartphone configuration

Call rates:

- Local calls: From R0.40/minute

- International (USA/Canada): R0.32/minute
- International (Australia): R1.06/minute

Axxess VoIP is ideal for home-based businesses and remote workers who need reliable, affordable telephony without complex business features.

The service requires stable internet connectivity (Fibre or Fixed LTE recommended).

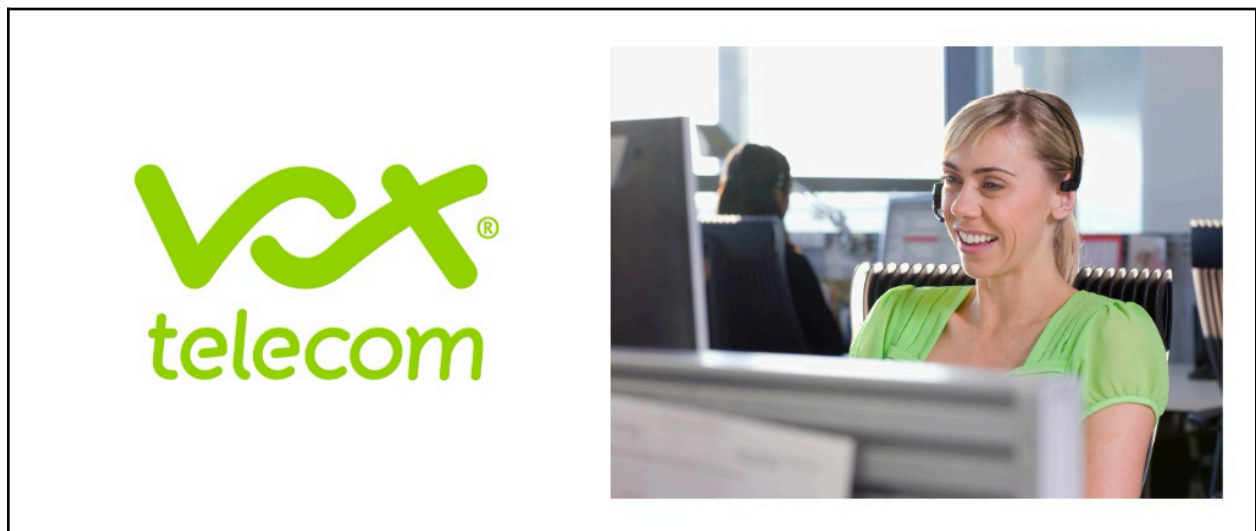

Explore [Axxess VoIP packages](#) for simple, contract-free voice communication.

H3: 9. Vox VoIP Packages - Best for Enterprise VoIP with Microsoft Teams Integration

<p> With a fully redundant network across South African and UK data centres, Vox delivers enterprise VoIP solutions for businesses requiring Microsoft Teams integration and exceptional call quality.

Vox offers Microsoft Operator Connect (unlimited or post-paid), Cristal Voice high-volume plans, Business Uncapped Voice for smaller teams, and Vobi mobile app options.

These packages offer up to 60% cost savings, seamless integration with Microsoft Teams, managed services, 24/7 fraud monitoring and support, and number porting capabilities.

H4: Microsoft Operator Connect:

- Unlimited or post-paid packages available
- Up to 60% savings on voice costs
- Integrated directly with Microsoft Teams

- Number porting or new number allocation
- Managed services with complete Teams integration

H4: Cristal Voice (post-paid, rated plans):

- High-volume, low-cost plans with competitive rates aligned to traffic volumes
- Up to 60% savings compared to traditional providers
- 24/7 fraud monitoring and specialist support
- Geographic and non-geographic numbers available

H4: Business Uncapped Voice:

- From R399/month (for up to 6 simultaneous calls)
- Suitable for businesses with 50 or fewer employees
- Unlimited calls to SA destinations at a fixed monthly rate
- No bill shock or fair usage policies

H4: Vobi Unlimited Mobile Voice App:

- From R29/month
- Mobile softphone for calls over a data connection
- No contract required
- Per-minute flat rate

Vox suits mid-to-large enterprises requiring Microsoft Teams integration, high-volume calling with guaranteed quality, or businesses prioritising network redundancy and 24/7 support.

Visit [Vox's website](#) to explore enterprise-grade VoIP solutions.

H3: 10. Euphoria Telecom VoIP Packages - Best for All-Inclusive Business VoIP Features

<p> With over 14 years of cloud PBX experience, Euphoria Telecom delivers VoIP solutions where enterprise features come standard rather than as costly add-ons.

Euphoria offers business phone packages (Express, Enterprise, Call Buster) and contact centre packages (Agent, Agent + Dialer), all of which include IVR, TMS, real-time monitoring, free interbranch calls, and data retention, scalable from 3 to 1000+ extensions on month-to-month contracts.

These packages provide complete built-in functionality, no long-term commitments, and flexibility to scale as business needs change.

Euphoria

Euphoria Business Telephone Packages:

H4: Express: R65/extension/month

- 4 call channels, 1 device registration
- Call forwarding, screening, and voicemail
- Basic features for small teams
- R1,500 setup + extension initiation

H4: Enterprise: R85/extension/month

- 4 call channels, 3 device registrations
- Queue participation with analytics
- Browser phone and advanced softphone
- API access, whisper/spy/barge features

H4: Call Buster: R185/extension/month

- All Enterprise features
- Special call rates (R0.29 cellular + R0.29 landline)

Euphoria Contact Centre Packages:

H4: Agent: R295/extension/month

- Advanced queue analytics, call recording
- 5-year retention, agent workspace
- Performance management, workforce management

H4: Agent + Dialer: R395/extension/month

- All Agent features plus outbound campaign builder
- Scripting and dialer participation

All packages include IVR, TMS, real-time monitoring, free interbranch calls, and 6-month data retention as standard.

Euphoria suits businesses that prioritise contract flexibility and transparent pricing, with comprehensive built-in features.

Visit [Euphoria Telecom's website](#) to explore scalable VoIP solutions.

H2: Final Thoughts on the Best VoIP Packages for Business

<p> We've explored the top VoIP packages from 10 leading South African providers, comparing pricing structures, included features, contract terms, and scalability across multiple package tiers.

From budget-friendly pay-as-you-go options (Afrihost, Axxess) starting at R50 per month to enterprise-grade solutions with Microsoft Teams integration (Vox) and multi-branch connectivity (Vodacom), these packages cater to diverse business communication requirements.

Selecting the right VoIP package requires evaluating several key factors:

- **Call volume patterns:** Determine whether unlimited calling or minute-based packages better suit your usage
- **Feature requirements:** Assess if you need advanced capabilities like call recording, CRM integration, and queue management
- **Contract flexibility:** Decide whether month-to-month flexibility or fixed-term contracts align with your operational planning
- **Growth trajectory:** Consider scalability options as your business expands

Once you've assessed these factors, the next step is finding a provider that matches your requirements.

United Telecoms specialises in VoIP solutions for small, medium, and large businesses requiring reliable multi-location communication and expert technical support.

With over 35 years of telecommunications experience in South Africa, we design scalable packages that range from LTE-based solutions to premium managed fibre services, all backed by dedicated support.

To learn more, read our comprehensive list of the [15 best VoIP service providers](#) in South Africa. [Contact United Telecoms](#) today to discuss which VoIP package aligns with your business communication requirements and explore our complete range of voice solutions.
